Electronic Health Record Modernization Integration Office

- Instructions From Your Provider
 - Written by the care provider(s) during the visit as part of their workflow.
- Scheduled Follow-Up Appointments
- You Need to Complete the Following
 - Pulls pending orders from that visit
- Someone Will Contact You Regarding These Appointments
 - Pulls pending scheduling requests

What to do next

Instructions From Your Provider

Continue to take medications as directed. We will plan on seeing you back in a month.

Scheduled Follow-Up Appointments

Thursday
Dec. 15, 2022
12:00 PM EST

Where:

Telehealth

You Need to Complete the Following

XR Chest 2 Views, *Est. 11/16/22, Routine, Reason: chest pain, 668 Radiology, Chest pain, Reportable

Someone Will Contact You Regarding These Appointments

Ambulatory Referral - VA. Optometry. Diabetic Eye Exam. 11/19/22 7:18:00 PST. Encounter for screening for eye and ear disorders

- Medications
 - Pulls reconciled medications showing what has changed/hasn't changed during the visit with the provider

Medications

	What	How Much	When	Instructions
<i>Unchanged</i>	chlorhexidine topical (chlorhexidine 0.12% (AF) mucous membrane liquid)	15 Milliliters Oral (given by mouth)	2 times a day	
<i>Unchanged</i>	fluoride topical (fluoride 1.1% topical cream)	1 Film Oral (given by mouth)	Every 24 hours as needed for other (see comment) prevent tooth decay	Duration: 30 Days
<i>Unchanged</i>	melatonin (melatonin 1 mg oral tablet)	1 tabs Oral (given by mouth)	Every day at bedtime as needed for as needed for insomnia	
<i>Unchanged</i>	metFORMIN (metFORMIN 500 mg oral tablet)	1 tabs Oral (given by mouth)	2 times a day	for diabetes

Ambulatory Visit Summary (section)

Provides a summary in a 2-column view:

- Your Diagnosis
 - Pulls the documented dx
- Tests Performed
 - Orders completed or pending during visit (e.g. Point of Care labs)
- This Is Your Medications List Only Take These Medications
 - Pulls simple meds list
- Procedures Performed
 - Includes any procedures document during visit & historical procedures
- Discharge Vitals
 - Lists last set of vitals and measurements documented during visit

Ambulatory Visit Summary

Your Diagnosis

Encounter for screening for eye and ear disorders
Primary open-angle glaucoma, unspecified eye, mild stage

Tests Performed

*Differential Automated -- Results Pending --
CBC w/ Diff
Glucose Level POC
SARS-CoV-2 ANTIGEN POC

You will be contacted within 72 hours with your results.

This Is Your Medications List Only Take These Medications

- chlorhexidine topical (chlorhexidine 0.12% (AF) mucous membrane liquid)
- fluoride topical (fluoride 1.1% topical cream)
- melatonin (melatonin 1 mg oral tablet)
- metFORMIN (metFORMIN 500 mg oral tablet)

Procedures Performed

Implant History

Dental Implant
Other

- Nobel Biocare Dental Implant 12/12/2021

Undefined Procedure
Body Site Undefined

- Implant Dental 11.5mm 4.3mm Nobelactive Internal Conical Connection Regular Platform Textured Collar Parallel Drill Reverse Cutting Flute Sterile Disposable (6), 05/24/2022

Discharge Vitals

Blood Pressure
165/70
Height
180 cm
Weight (Measured)
80 kg
BMI
24.69

- Test Results
 - Lab results from visit
- Medication & Immunizations Administered
 - List of any medication/immunization administered during visit
- Allergies
 - Pulls list of active allergies
- Problems
 - Ongoing:
 - Pulls active problems

Test Results

Event Name	Event Result	Date/Time
WBC	5 10 ³ /uL	11/16/22 08:35:00
RBC	5 10 ⁶ /uL	11/16/22 08:35:00

Medications and Immunizations Administered

Given

influenza virus vaccine, inactivated, 0.5 mL, IntraMuscular. For: Encounter for screening for eye and ear disorders
influenza virus vaccine, inactivated, IntraMuscular

Allergies

aspirin (Emesis)
Apples (Hives)
Peanuts (Itch)

Problems

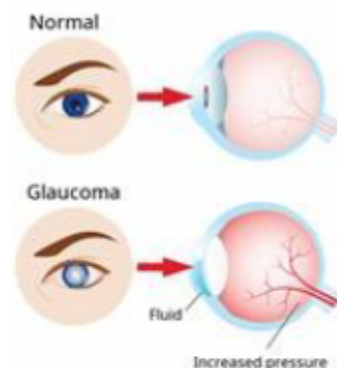

Ongoing - Any problem that you are currently receiving treatment for.

Diabetes mellitus type 2 without retinopathy
DVT (deep venous thrombosis)
Neurogenic bladder due to quadriplegia

- Pulls in all the education leaflets the care provider added for the Veteran during the visit (e.g. custom and/or provided by standard Elsevier materials).
 - Note providers can add notes/customize the leaflets as necessary to personalize the materials for the Veteran

Education Materials

Glaucoma

Glaucoma is a condition that is caused by high pressure inside the eye. The pressure in the eye is raised because fluid (aqueous humor) within the eye cannot get out through the normal drainage system. The increased pressure can cause damage to the nerves of the eye, and that can result in loss of vision. It is important to diagnose glaucoma early before damage occurs. Early treatment can often prevent vision loss.

There are two main types of glaucoma:

- Open-angle glaucoma. This is a long-term (chronic) condition that causes the pressure inside the eye to rise slowly. This is the most common type of glaucoma. In many cases, it does not cause symptoms until later in the disease.
- Acute angle-closure glaucoma. With this type, the pressure inside the eye rises suddenly to a very high level. This causes severe pain and requires treatment right away.

What are the causes?

In many cases, the cause of this condition is not known. Glaucoma can sometimes result from other diseases, such as infection, cataracts, or tumors.

What increases the risk?

Common Emergency Awareness Tips

IS IT A STROKE?

FACE

ARM

SPEECH

TIME

Act **FAST** and Check for these signs:

Does the face look uneven?

Does one arm drift down?

Does their speech sound strange?

Call 9-1-1 at any sign of stroke

Heart Attack Signs

Chest discomfort: Most heart attacks involve discomfort in the center of the chest and lasts more than a few minutes, or goes away and comes back. It can feel like uncomfortable pressure, squeezing, fullness or pain.

Discomfort in upper body: Symptoms can include pain or discomfort in one or both arms, back, neck, jaw or stomach.

Shortness of breath: With or without discomfort.

Other signs: Breaking out in a cold sweat, nausea, or lightheaded.

Remember, **MINUTES DO MATTER**. If you experience any of these heart attack warning signs, call 9-1-1 to get immediate medical attention!
