Monthly Summary

During the month of November, the team focused on preparing the Minimum Viable Product (MVP) for the Pre-Check In experience including design, architecture, and coding of the Pre-Check In screens. Research reports around pilot site visits and user testing insights were also prepared and disseminated to synthesize what our team has learned by working with real users. **Next of Kin functionality was delivered on November 1st. The Pre-Check In MVP development is complete and the team has finished integration testing.**
