What is it?

Facility Locator is VA's single source of truth for customers to find details about all VA and VA-approved facilities, across VHA, VBA, and NCA and Community Care. It serves many purposes, from finding basic facility address and phone information to preparing for a visit, to understanding eligibility for community care.

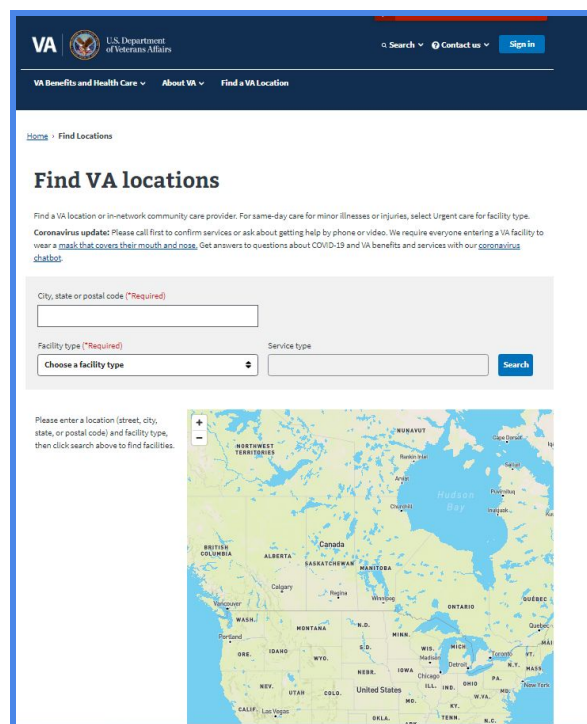

User Access

Who can access these tools?

Anyone can access VA.gov's Facility Locator. It is part of the unauthenticated experience and can be accessed publicly.

How can users access these tools?

Directly via <https://www.va.gov/find-locations>

The screenshot shows the VA Facility Locator website. At the top is the VA logo and navigation links: Search, Contact us, and Sign in. Below the header, there are links for VA Benefits and Health Care, About VA, and Find a VA Location. The main heading is "Find VA locations". Below this, there is a search form with a text input for "City, state or postal code (*Required)", a dropdown for "Facility type (*Required)", and a text input for "Service type". A "Search" button is to the right of the service type input. Below the form, there is a map of the United States and parts of Canada. The map shows state and provincial boundaries and names. A small text box on the left of the map says "Please enter a location (street, city, state, or postal code) and facility type, then click search above to find facilities."

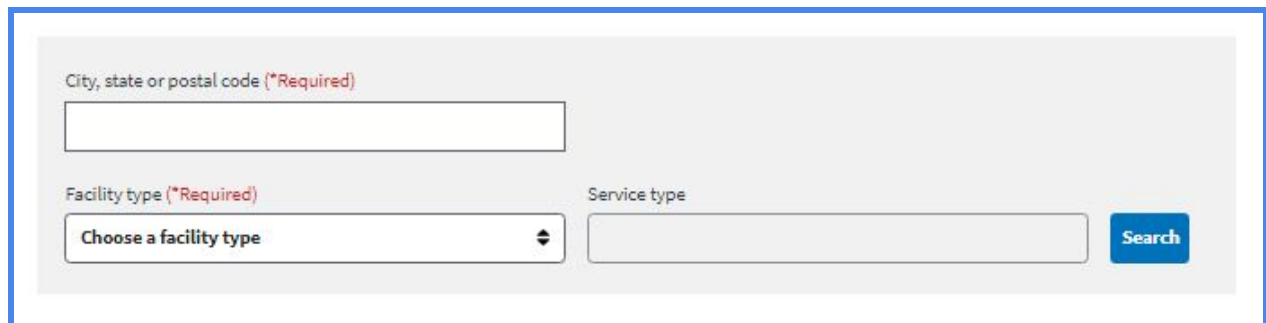

Or by selecting "Find a VA Location" from the <https://www.va.gov> homepage.

Navigation

Facility Locator has two primary pages.

Landing page (Search page)

Facility searches are performed on this page by inputting location, VA facility type and service type (if indicated). The user can also enable their location through the browser when prompted. When the Veteran lands on the search page, the fields are empty by default, unless he/she has navigated from another page which auto-populates the Facility type field.

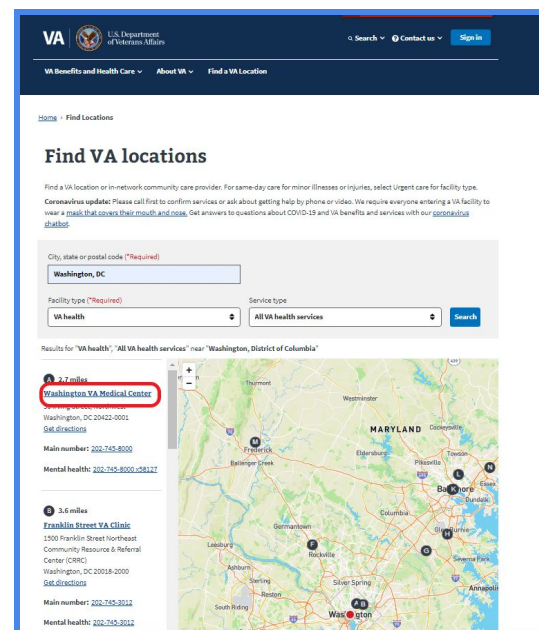

The screenshot shows the search form on the Facility Locator landing page. It includes a text input field for "City, state or postal code (*Required)", a dropdown menu for "Facility type (*Required)" with the placeholder text "Choose a facility type", and a text input field for "Service type". A blue "Search" button is located to the right of the service type field.

Facility Detail page

Additional information about the facility can be found on the Facility Detail page which is accessed by clicking on the name of the location in the search results box.

This type of page is not available for Community urgent care providers or pharmacies.

The screenshot shows the Facility Detail page for the Washington VA Medical Center. The page header includes the VA logo and navigation links. The main heading is "Find VA locations". Below this, there is a search form with the location "Washington, DC" entered in the "City, state or postal code (*Required)" field. The "Facility type (*Required)" dropdown is set to "VA health", and the "Service type" dropdown is set to "All VA health services". A "Search" button is present. Below the search form, the results for "VA health" near "Washington, District of Columbia" are displayed. The first result is the "Washington VA Medical Center", which is highlighted with a red box. The details for this facility include its address (Washington, DC 20422-5001), main number (202-745-8000), and mental health number (202-745-8000 x58127). A map on the right shows the location of the facility in Washington, DC.

Legacy Directory Link

The link below the map connects users to the legacy directory. Once the modernized Facility Locator has reached parity with the legacy directory, this link will be sunset.

Search functionality

Location

The location field is mandatory. Users may enter the city, state and zip or enable location in their browser.

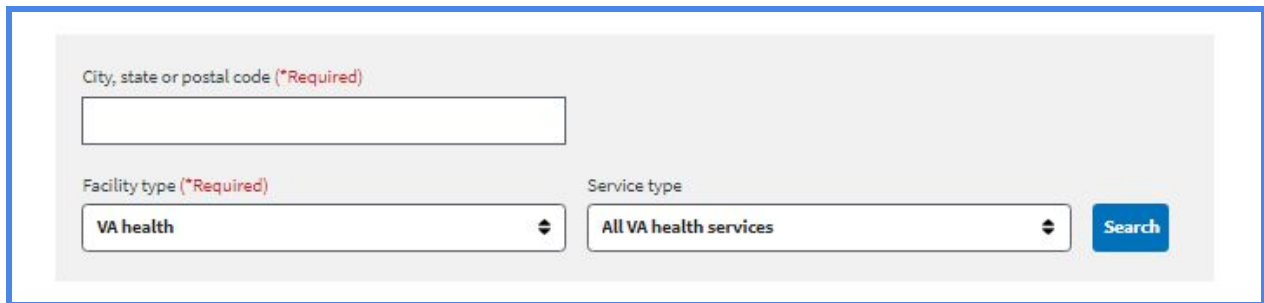

By default, unless the user enters a street address, the search will be performed based on the center point of the location parameters entered (the center of the city or zip code, for example).

VA facility type

The user must then choose a VA facility type from the drop down list of options. The field defaults to “Choose a facility type”.

VA Health

If VA health is selected, it defaults to All VA health services and the user should just click Search.

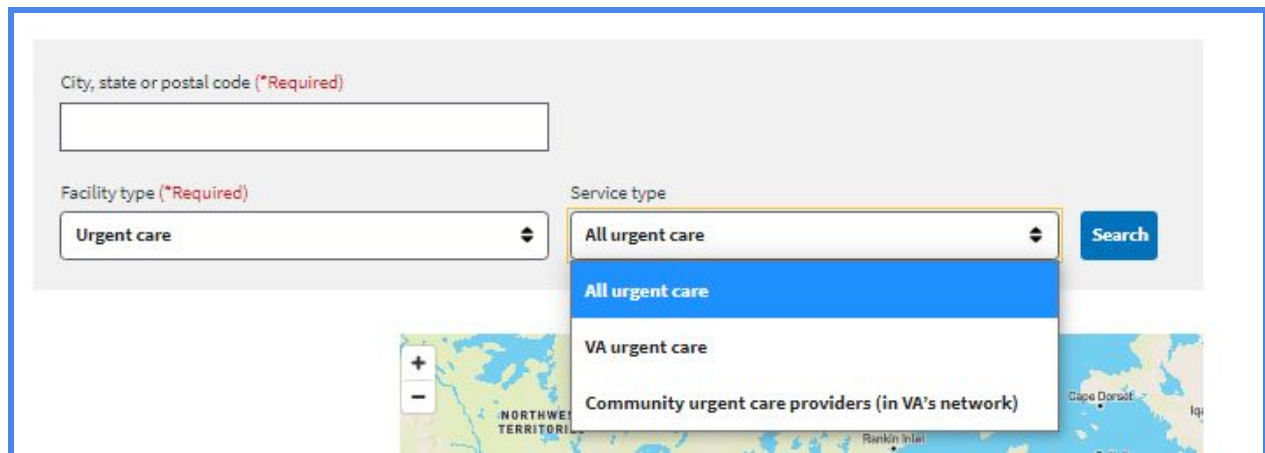

A screenshot of a search interface for VA Health. It features a text input field for "City, state or postal code (*Required)". Below this are two dropdown menus: "Facility type (*Required)" with "VA health" selected, and "Service type" with "All VA health services" selected. A blue "Search" button is positioned to the right of the dropdowns.

Urgent Care

If Urgent care is selected, the user should choose

- VA urgent care to see results for VA owned and operated locations or
- Community urgent care providers (in VA's network) to view urgent care facilities and walk-in/retail locations.
- All urgent care to view a list containing both

A screenshot of the search interface for Urgent Care. The "Facility type" dropdown is set to "Urgent care". The "Service type" dropdown is open, showing three options: "All urgent care" (highlighted in blue), "VA urgent care", and "Community urgent care providers (in VA's network)". A blue "Search" button is visible to the right. In the background, a map of the Northwest Territories is partially visible.

Alert for Community urgent care providers (in VA's network)

Users searching *All urgent care* or *Urgent care plus Community urgent care providers in VA's network* will see an alert within any Community care result cards. Clicking the button directs the user to a page from the Office of Community Care. The page provides information regarding the urgent care benefit, including billing information for the Veteran and providers.

Find VA locations

Find a VA location or in-network community care provider. For same-day care for minor illnesses or injuries, select Urgent care for facility type.

Coronavirus update: Please call first to confirm services or ask about getting help by phone or video. We require everyone entering a VA facility to wear a [mask that covers their mouth and nose](#). VA benefits

If **VA benefits** is selected, service type defaults to *All VA benefit services*. The user can also select an option from the **service type** dropdown before clicking **Search**.

A screenshot of a search form for VA benefits. The form is enclosed in a light gray box with a blue border. It contains three input fields and a search button. The first field is labeled "City, state or postal code (*Required)" and contains the text "Washington, DC". The second field is labeled "Facility type (*Required)" and contains the text "VA benefits". The third field is labeled "Service type" and contains the text "All VA benefit services". A blue "Search" button is located to the right of the "Service type" field.

VA cemeteries

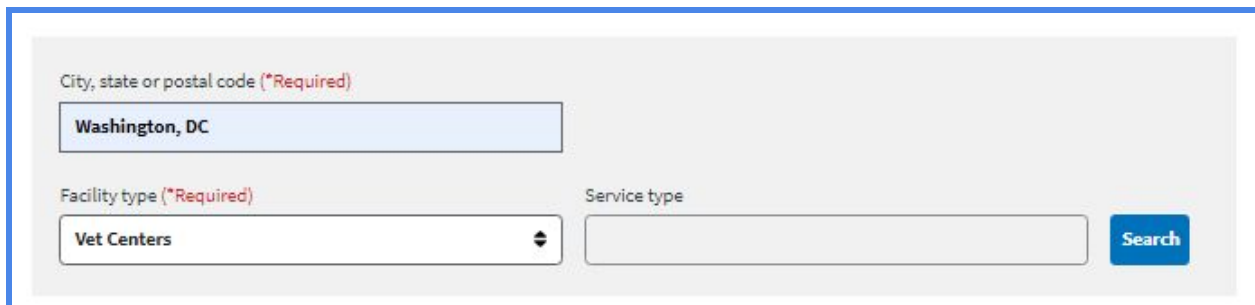

If **VA Cemeteries** is selected, no **service type** is needed and the user should just click **Search**.

A screenshot of a search form for VA cemeteries. The form is enclosed in a light gray box with a blue border. It contains three input fields and a search button. The first field is labeled "City, state or postal code (*Required)" and contains the text "Washington, DC". The second field is labeled "Facility type (*Required)" and contains the text "VA cemeteries". The third field is labeled "Service type" and is empty. A blue "Search" button is located to the right of the "Service type" field.

Vet Centers

If **Vet Centers** is selected, no **service type** is needed and the user should just click **Search**.

A screenshot of a search form for Vet Centers. The form is enclosed in a light gray box with a blue border. It contains three input fields and a search button. The first field is labeled "City, state or postal code (*Required)" and contains the text "Washington, DC". The second field is labeled "Facility type (*Required)" and contains the text "Vet Centers". The third field is labeled "Service type" and is empty. A blue "Search" button is located to the right of the "Service type" field.

“Search this area of the map”

As of December 2020, once search results are returned, if the Veteran zooms or pans the map, a new “Search this area of the map” button displays at the top of the map. Clicking the button will trigger a new search.

Search results

Regardless of VA facility or service type chosen, the results will be presented on one or more cards in a list next to the map. The results are presented in ascending order, based on distance.

Planning to visit? Please call first as information on this page may change.

Veterans can learn more about the facility operating status by visiting the facility detail page.

It is expected that the details may be different depending on the facility. Not all facilities will use operating status alerts.

FAQ

What if the Veteran believes the info displayed about the facility is incorrect? (For example, they have received women's care at the facility but it isn't listed as a service.)

If the user reports inaccurate information (the hours of operation are not what they know them to be, for example), we have the following feedback options:

1. For VA facilities (VHA, VBA, NCA and Vet Centers): Contact Center agents should email the name of the Facility (and other available info) and the missing or inaccurate detail to Dave Conlon (david.conlon@va.gov) and Michelle Middaugh (michelle.middaugh@adhocteam.us).
2. For community care providers and pharmacies, Contact Center agents should email the name of the Facility (and other available info) and the missing or inaccurate detail to VHAOCCPPMSPROJBUSPOCS@VA.GOV, copying Tobie Wethington (Tobie.Wethington@va.gov), Dave Conlon (david.conlon@va.gov) and Michelle Middaugh (michelle.middaugh@adhocteam.us).
