Hello All,

BSO Functional Testing Unit completed UAT to confirm Veteran Online Applications have updated required fields of the 10-10 EZ form:

- Insurance Information\_Medicare:
  - Veterans are required to provide Medicare Part A (hospital insurance) response.
  - Veterans are required to enter Date and Medicare claim number (30 character max) response when Medicare is marked yes.
  - Explanation of inquiry displays.
- Veteran Information\_American Indian or Alaskan Native:
  - Veterans can self-report/select American Indian or Alaskan Native race, ethnicity, or origin on VOA application.
  - Veterans are required to provide a response to determine if recognized as an American Indian or Alaska Native by any tribal, state, or federal law or regulation.
  - Explanation of inquiry displays.

*Note: Veteran Online Application is pointed to SQA VES environment. PR approval process is required to change the environment to Pre-Prod (estimated 1 week process). Testers were granted SQA access and testing was completed in SQA environment.*

*SQA VES uses Spokane as the preferred facility, all tests were assigned to Spokane to confirm expected results.*

**Testers confirmed that all online applications successfully transmitted to SQA enrollment system.**

Thank you,

Stephanie D. Baldwin

Update to my previous advice about using boston as the preferred facility in pre-prod; in SQA use Spokane 668.

Accounts have been created, let me know if you have any issues with permissions - <https://sqa.ves.va.gov/esr>

Lihan, no need to change the endpoint.

OK thanks for the info. We can get the environment changed next week, the change has to go through the PR approval process.

They are not using any authenticated users for HCA; just the anonymous route so it won't matter if your MPI is pointed to SQA and the HCA gets posted to our pre-prod. In the anonymous flow we will add the identity to the MPI pre-prod when the application is received.

Hey, I have a question about changing the environment to [prep.ves.va.gov](http://prep.ves.va.gov). We are currently using the SQA MPI environment in staging, we can't change this because other applications rely on data from that environment. If we change the HCA endpoint to prep is it compatible with data from SQA MPI?

Is it possible to look for the applications in sqa?

On Fri, Aug 5, 2022 at 1:13 PM Heather Justice <[heather.justice@adhocteam.us](mailto:heather.justice@adhocteam.us)> wrote:

It is currently pointing to [sqa.ves.va.gov](https://sqa.ves.va.gov). We can work to get that pointing to the provided endpoint [prep.ves.va.gov/voa/voaSvc](https://prep.ves.va.gov/voa/voaSvc)

Not really; it should process within about one minute, but I don't see anything recent being received in ES pre-prod.

Heather can you confirm the endpoint the staging site is posting to? It should be [prep.ves.va.gov/voa/voaSvc](https://prep.ves.va.gov/voa/voaSvc)

**Subject:** Question for 1010EZ testing

When submitting the application from [staging.va.gov](https://staging.va.gov) to Preprod VES is there a wait time before VES picks it up? In the VA.gov production system there is not.

We are experiencing VES not picking up the submitted applications and want to know the acceptance criteria/expectations.

Thank you!
