

The future of health care is in your genes

Imagine going to your doctor's office and getting care designed just for you.

By joining VA's Million Veteran Program, you can help make that a reality.

What is the Million Veteran Program?

We are a research program of almost 1 million Veterans.

By collecting DNA from as many Veterans as possible, along with information on their health, lifestyle and military experiences, MVP researchers are beginning to answer important questions like:

- Why does a certain treatment work well for some Veterans but not others?
- Why are some Veterans at greater risk for developing an illness?
- How can we prevent certain illnesses in the first place?

Veterans do not need to receive VA health care to join MVP.

If you decide to join, you will be asked to:

- Provide informed consent and allow access to your health records
- Give a blood sample for genetic analysis
- Fill out surveys about health and lifestyle
- Agree to future contact for additional research

When you join MVP, your information is kept private and secure.
