

# How to set up the VA Mobile App prototype on an Apple phone

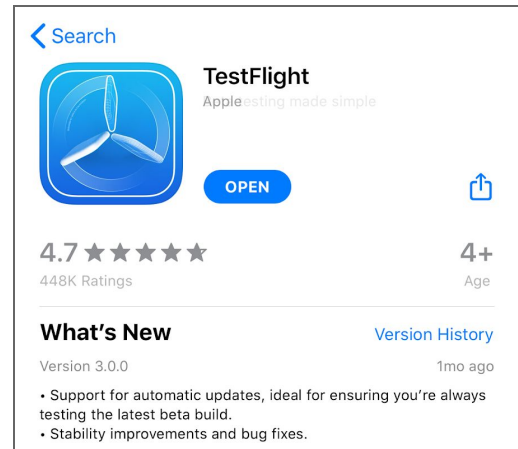

**You will need:** Your Apple phone, Apple ID and password, Access to your email account

## Step 1

First, check your email to make sure you have been sent an invitation to use the app. You will have an email in your inbox to the email associated with your Apple ID inviting you to use the VA Mobile App prototype. The email will be from the email address [no\\_reply@email.apple.com](mailto:no_reply@email.apple.com). The subject line will say something like “VA Mobile for iOS is now available to test.” If you have received the email, you are ready to go to step 2.

## Step 2

Download the mobile application TestFlight on your iPhone from the Apple App Store.

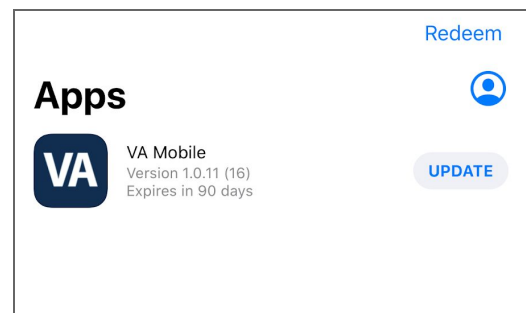

## Step 3

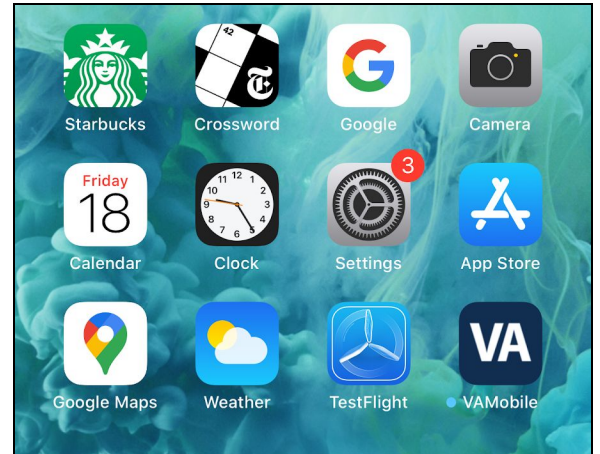

Once you have downloaded TestFlight, sign in with your Apple ID and password.

## Step 4

Once logged into TestFlight, under Apps you should see a prototype app labeled VA Mobile. Click to install the VA Mobile app on your device.

Once successfully downloaded, the VA Mobile will show up as a separate icon labeled as **VA Mobile** on your mobile app's home screen.

**Please come to your session prepared to sign in to the mobile app using your ID.me, DS Logon, OR MyHealtheVet credentials.**
