

Medicare Remittance Advice

Article ID: 554400000048828

Updated Aug 23, 2021

Overview

This article provides guidance on the Medicare Remittance Advice (MRA).

The MRA allows the Department of Veterans Affairs (VA) to create an Explanation of Benefits (EOB) outlining what Medicare would have paid VA if Medicare were not prohibited by law from paying for health care services provided by the VA to eligible veterans.

VA Uses

The MRA is used by the VA to create a secondary bill to those carriers who require an EOB from Medicare prior to making payment. Medicare was not billed and did not pay for your health care services.

Veteran's EOB

You will also receive an EOB which details Medicare payment information and patient responsibility amounts. You are not responsible for payment of any amount other than what has been billed to you by VA.
