Accessibility Audit Tracking Sheet: VA Forms Library Burial Example A11y Testing: Roadmap

To add an accessibility ticket to the VAFSC repo:

- Create the ticket in the va-forms-system-core repository
- Add the VA Forms System Core label and any relevant accessibility labels
- Assign it to the VAFSC Accessibility Support epic
- Assign it to the Accessibility Issues (FL and VAFSC) pipeline
- **NOTE**: You can also create the ticket from the FLT ZenHub board; this will automatically assign the VA Forms System Core label to the ticket.
- Here is what an example ticket looks like: https://github.com/department-of-veterans-affairs/va-forms-system-core/issues/482
