N/A	None
Highlighted differences	
	I couldn't find schools that I was looking for. I'm not sure if all of the schools are loaded in the system. When I inserted Medical I received a mixture of medical schools and on the job training.
Easy to compare two schools	
I liked seeing the schools side by side	None, was user friendly
Searching for schools was very easy and it is advisable to keep that up and maintain.	None
Overall, the tool was highly intuitive and provided the information I was looking for as it related to the research study.	Nothing frustrating or confusing but would recommend including a different color coding system when using the side-by-side comparison tool (perhaps a red/yellow/green system versus using the same color for all categories).
the map is really great.	on the map some colleges came up as being in other states, like a PA school in Washington DC.
It did work pretty easily to add more to compare and made it obvious only a max of 3 was possible. Also, for the majority of the stuff I thought was weird, there was an easy to click link to explain it.	Mostly the tool is straightforward but I don't like that it's got a lot of information that I really don't need but not anything about the available programs (doctors, computer science).
	As a Montgomery and Post 9/11 vet the calculator didn't work for me
ease of movement	none
i liked comparing the rates for tuition to see which school I can get the most benefits from	none at all
I LIKE THAT I COULD CLICK ON THE SCHOOL TO GET MORE INFORMATION ABOUT THE SCHOOL(DEGREES OFFERED)	NO PROBLEMS WITH THE TOOL
Finding schools to compare was easy.	I had issues selecting schools to compare at first. Took me a couple minutes to figure out.
Search by name worked a lot better than I expected. I'd seen this tool before but ignored it.	Search by location should have an option to hide the map once you've chosen a location. It makes the information to the left of the map too cramped to read easily.
I like the comparison tool. It was easy to use and gave lots of information	None

I liked the fact that you could change the type of benefits being received or plan on receiving and then clicking on "update" to see how the different programs affected the cost of attending the schools interested in. I also liked the "highlight differences" option to be able to see the differences between the compared schools easier.....the highlighting of the table fields were a great touch. Lastly, I loved the fact that there were indicator warnings for particular schools that have been under scrutiny for various reasons....this would let the searcher know to be leery or cautious about attending those schools or to let them know that they have to do more research on them before enrolling.

Loved side by side comparison   Loved highlighted difference

No frustrations or confusion.

None

It's a good resource for checking out whether or not a school you want to attend is a good choice, and for finding other options.	f7	
That it's easy to use and quick in giving useful information	L7	

I would tell them to seriously check it out because they could find schools that are better for them in terms of cost and return on investment upon completion of their education.   RP

Easy to use and self explanatory   vi
